Isaac Mitchell has over fourteen years experience driving change utilizing lean methodology in organizations ranging from automotive manufacturing, fiberglass boat production, machining job shops, and healthcare systems. He is a full-time lean practitioner at East Tennessee Children's Hospital, a lecturer at the University of Tennessee's Department of Industrial and Systems Engineering, and an instructor for the Institute of Industrial and Systems Engineers. He holds a Master of Business Administration from Xavier University and Bachelor of Science in Industrial Engineering from The University of Tennessee. Additionally, he holds a Lean Six Sigma Black Belt certification through the Institute of Industrial Engineers, a Project Management Professional (PMP)<sup>®</sup> certification through the Project Management Institute, and is a Certified Professional in Healthcare Quality (CPHQ)<sup>®</sup> through the National Association for Healthcare Quality. He serves on the Board of Directors for the Tennessee Hospital Association's Society for Organizational Improvement, the Institute of Industrial and System Engineer's Society for Health Systems, and the American College of Healthcare Executives (ACHE) East Tennessee Health Executives Affiliation. His passion and focus is on training and implementing lean techniques that transform work cultures to improve healthcare processes and outcomes for patients and providers.
